

Expedite the development of wireless device tests with automated test development and support

Quickly and easily meet time-to-market goals and reduce test cost

Agilent's Wireless Test Manager (WTM) software saves time and resources when automating mobile device testing. Designed for use with Agilent's 8960 test set (E5515C), the test manager makes test development, support, and use easier than ever. Applicable to manufacturing, R&D, and service, the test manager includes a test executive, technology-specific tests, easy-to-use interfaces, Visual Basic or Visual Basic .NET programming, and Windows PC compatibility.

Features

- Multi-format software platform (W-CDMA, cdma2000, 1xEV-DO, IS-95, GSM, GPRS, EGPRS, IS-136 TDMA, AMPS, and *Bluetooth*[®])
- Easy to customize test sequences, parameters, and specifications to meet your testing needs
- The power of Microsoft[®] Visual Basic[®] or Visual Basic .NET[®] for custom test development (customer-provided development platform dependent upon WTM product selection)
- Test wizard allows you to focus on test development by simplifying programming
- Agilent experience and measurement knowledge supplement your mobile phone design and testing expertise

Agilent Technologies

Simplify and expedite test efforts

Designed specifically for test engineers, the test manager reduces the complexity associated with automating device testing. Why spend time on computer control and data management issues when the test manager does this for you and lets you focus on test?

Use Agilent or custom test plans

Run a pre-defined Agilent test plan, customize an existing plan, or create your own custom test plan. The test manager makes it easy to modify test parameters, adjust test limits, change the order of test steps, or build your own test plan – without programming.

Create custom test steps

To guide you through the process of adding your own custom test steps, the test manager features a test wizard. Tests created with the wizard and Visual Basic or Visual Basic .NET are added to the test menu and can be used in a custom test plan without additional programming.

Flexibility to meet your test needs

The WTM makes it easy to configure system hardware. It provides for point and click set-up of the 8960 test set and selected power supplies, bar code readers, test fixtures, and printers. Other instruments can be added with a wizard using the development version. Plus, it gives you the flexibility to save test results for further analysis, and set run conditions to stop, continue, or retry on failure.

Reduce overall test costs

The WTM is easy to learn and simple to use. You will not have to learn complex applications and multiple programming languages to support test. Save on production line costs with the E6571A or E6571C run-time license. The run-time license can be used with any technology covered by the WTM family. Use a standard WTM to develop a custom WTM application then deploy that custom application to your run-time system.

Wireless Test Manager products

Visual Basic .NET (USB security key)

- E6560C for cdma2000, IS-95, and AMPS (development and run-time)
- E6562C for W-CDMA (development and run-time)
- E6564C for 1xEV-DO (development and run-time)
- E6566C for GSM, GPRS, and EGPRS (development and run-time)
- E6567C for cdma200, IS-95, AMPS, and 1xEV-DO (development and run-time)
- E6568C for W-CDMA, GSM, GPRS, and EGPRS (development and run-time)
- E6569C suite (includes E6560C, E6564C, and E6568C)
- E6571C run-time only license combination and suite products (cannot use E656XA/B versions)
- N5880A Enhanced Wireless Test Manager for cdma2000, IS-95, and AMPS (development and run-time)
- N5882A Enhanced Wireless Test Manager for W-CDMA (development and run-time)
- N5884A Enhanced Wireless Test Manager for 1xEV-DO (development and run-time)

Visual Basic 6 (parallel security key)

- E6564A for 1xEV-DO (development and run-time)
- E6569B suite (includes E6560A, E6563A, E6564A, and E6568B)
- E6571A run-time only license combination and suite products
- N4019A for *Bluetooth*
- N4018A *Bluetooth* Wireless Test Manager run-time license
