Wireless Walk Test Solution

SeeHawk® Touch
ATTAIN NETWORK EXCELLENCE

## Wireless RF Network Data Collection, Analysis, and Resolution Made Easy

SeeHawk® Touch is designed to meet the needs of the high-demand in-building wireless market. This powerful and convenient network data analysis software features a touchscreen interface optimized for Android™ mobile devices. Bluetooth® connects SeeHawk Touch with the SeeGull IBflex® scanning receiver for in-building walk tests to analyze the performance of LTE, Wi-Fi, and other wireless networks.

FEATURES & BENEFITS

- Designed for ergonomic and easy RAN data collection
- Collect data across all cellular technologies, including Wi-Fi
- Fully integrated with iBwave Mobile Planner and Mobile Note
- P25 channels RSSI measurements
- Signal Analyzer optional feature
- Turn results into improved network coverage and capacity

SeeHawk® Touch with SeeGull IBflex®

APPLICATIONS

- Wireless Site Surveys and Benchmarking
- Coverage and Quality Analysis
- Site Design
- In-building DAS Small Cell Integration and Antenna Health Check
- Troubleshooting and Model Tuning
- Network Optimization
